EDUCATION

Bachelor of Computer Science,
Trinity Western University, Langley, BC

Expected Grad: Dec 2027

EXPERIENCE

Software Developer Intern, Pilotfish

May 2025 – Aug 2025

- Helped deliver a customer-facing Microsoft 365 portal that centralized access to assets, licensing, invoices, and support information, reducing manual customer requests by approximately 70%.
- Worked with operations and support teams to identify workflow bottlenecks and implement automation solutions that improved efficiency and reduced manual effort.
- Collaborated across technical and business stakeholders to deliver customer-facing features and process improvements.

LEADERSHIP

Founder & President of 3D Printing & Modelling Club

Sept 2025 – Apr 2026

- Founded Trinity Western University's first 3D Printing & Modelling Club, identifying student demand and building a new campus organization from concept to launch.
- Led a multidisciplinary executive team responsible for budgeting, event planning, organizational growth, and stakeholder engagement with faculty, student government, and club members.

PRODUCTS & PROJECTS

Capalation - Mobile Photo Competition App ([Website](#))

- Conceived and launched a mobile social platform that enables friends to run photo competitions through submissions, voting, and community engagement features.
- Defined product requirements, prioritized features, and led development from initial concept through App Store submission and launch.
- Designed moderation and operational workflows through an administrative dashboard supporting photo reports, appeals, subscriptions, user credits, notifications, and platform governance
- Conducted user interviews and managed a feedback board with prospective users to prioritize features, refine onboarding, and inform product roadmap decisions.

High-Performance API Gateway ([GitHub](#))

- Defined requirements and roadmap for an API management platform supporting authentication, rate limiting, caching, analytics, and developer tooling.
- Developed an asynchronous analytics pipeline for API usage, latency, cache performance, and error monitoring without impacting request processing.
- Established success metrics around latency, reliability, and platform adoption; benchmark testing validated ~16.7k requests/sec throughput and ~0.5 ms median gateway overhead.
- Used load-testing insights to identify a scalability bottleneck in upstream connection management, driving improvements that increased throughput 15× and reduced p99 latency from 653 ms to 18 ms.

SKILLS

Product: Roadmapping, Requirements Gathering, MVP Definition, Stakeholder Management, Agile Development

Technical: SQL, Python, TypeScript, REST APIs, React Native, Supabase

Business: Data Analysis, Cross-Functional Collaboration, Presentation, User Research
